

1st Special Nursery school of Patras, Greece
ACTIVITIES 2020 – 2021 during pandemic time

SITUATION AT SCHOOL DURING PANDEMIC TIME

At the start of the pandemic, schools were totally closed down and only after some months the lessons by teleconference started. We

tried to implement some teleconference lessons, but it was totally impossible, because due to the severe difficulties of our students and the small age of them, was not possible to communicate (lack of attention, no interest of cooperation through a screen ect)

Later on, and even pandemic insisted, special schools opened

because it was obvious that our students could not benefit from distance learning. But even schools opened, the measures were so

strict that only a few activities could be performed. All extra

activities e.g. going out of school or gather all together, were not allowed, so we only performed the core curriculum activities.

ACTIVITIES

So we integrated some activities related to the topic of our project to the daily lessons but not formally, as the project – as all the Erasmus projects during that time – were “frozen” and no guidelines were given from NAs of how to proceed but just actions to the postpone the projects.

In next screens we are presenting you some activities related to the topics of our project.

Teamwork: SEABED

Teamwork: SEABED

- Ribbons
- Corn flakes
- Used aluminum foil
- Paper plates
- Cupcake papers
- Fossils

Tactile exercises

- plastic caps
- cotton
- newspapers
- wool
- pasta
- sponge
- wire

Making "fishes" from paper plates

COUNTING....

.... with plastic plates

.... with toilet paper rolls

BOWLING

Fun with plastic glasses

SNOWMAN from used shocks

Merry Christmas
