WONDER OF WASTE

A K R A S E L

PROJECTS

- *The oldest children at Akrasel (5-6 years old) have many opportunities to play outside in nature and thus capture ideas for various projects we do in our school.*
- *The fragrance of nature is reflected in the children's work and connects them with the wonders of nature and creative environmental awareness.*

Playing with nature's gifts -
forms and shapes, color and
structure.

*“Immortal
plants”*

*We extend the
life of our
plants.*

"Art on the wall"

„**Holtasóley**“; national flower of Iceland. Learning the name of our plants located in our small forest in our hometown.

We do our best to help others; we sell our artpieces at an artshow and the profit goes to our friend in Africa.

Big world / small world

- We have a unik world only a few meters from our school; "Skógræktin", a.k.a. "our small forest", just inside our hometown.
- We bring the classroom outside; for the children and teachers to enjoy the smell, structure and shape of our environment.

Forest art

We use things that nature provides, without harming anything in our environment.

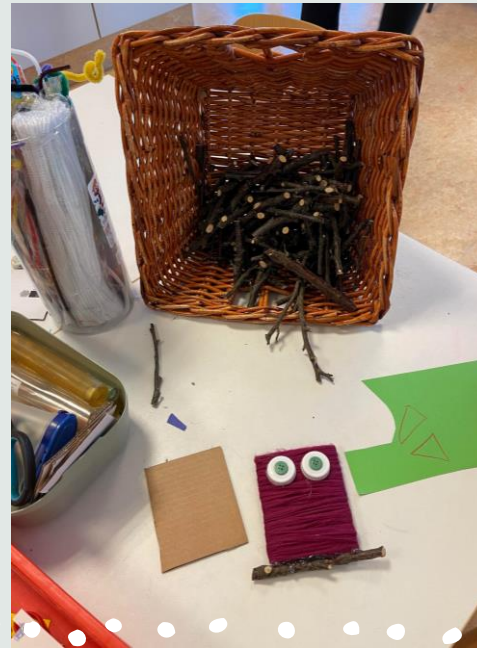

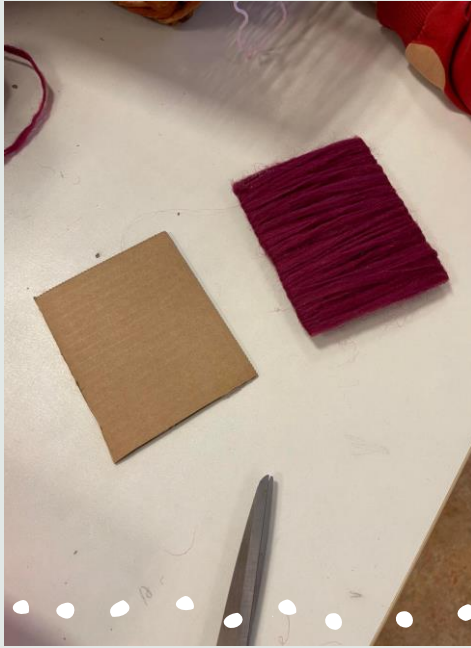

Working with waste materials

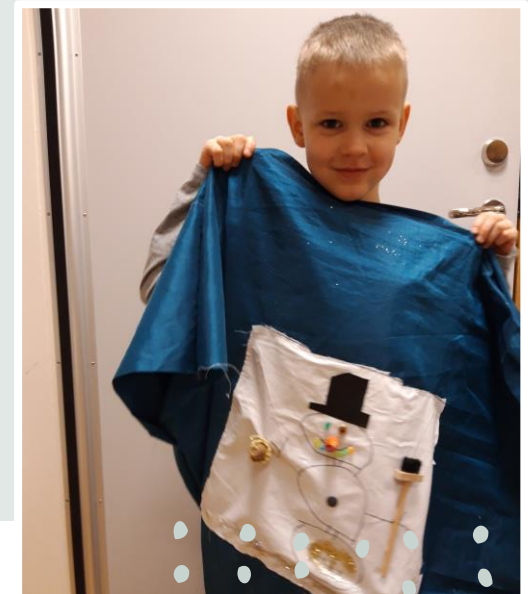

Children at the age of four - working
with colors and shapes
- Used products make a colorful art on the wall -

*Funny owls from "our forest".
Made with branches from our trees and other
waste materials*

Christmas – time of creating
design and recycling.

The process:

And the result:
happy mum
and dad with
there new outfit

TAKK FYRIR 😊

Leikskólinn
Akrasei
Náttúra - Næring - Nærvera

The logo for Akrasei Leikskólinn features a stylized green graphic of three figures holding hands, with the text 'Leikskólinn' above the name 'Akrasei' in a large, bold, brown font. Below the name is the tagline 'Náttúra - Næring - Nærvera' in a smaller green font.
