

REDUSE

Haugland gardsbarnehage

Our focus for teaching children to reduce

- Focus on turning off the tap after washing hands – to reduce our water use
- Sending a fabric bag for changing clothes instead of a plastic bag between the home and the kindergarten – to reduce the plastic use

- To reduce – we can re-use:

Fix old socks instead of buying new ones

Children learn how to use a needle. They also learn things can be fixed – no need to throw away everything that's broken

- We wrote letters in the milk cap
- We made instruments

- We reduced the waste by finding new area to use the waste
- Decorating milk carton and use it for sow seeds
- Using jam jar to plant in
- Using old rain boots for sow seeds in

And we made art out of waste

We became better giving leftovers to the animals
